

LICOPTER P720

The LiDAR Drone

Multi-Sensor Intelligence for True 3D Reality Capture

Long Endurance

Built to get long endurance of 40 minutes with LiDAR payload. This helps you harness more data in a single charged flight and get your work done faster.

Cutting Edge Safety

The LiCopter features an innovative, compact design that folds down from 900mm to 450mm, integrating a front detect-and-avoid system for enhanced safety and obstacle avoidance.

Stable Orientation

The LiCopter utilizes GPS-based yaw control to counteract high electromagnetic interference, enabling stable flight even in close proximity to power lines for precise inspections.

Indigenous LiDAR Sensor

Expertly engineered, our indigenous LiDAR payload seamlessly integrates advanced LiDAR, IMU, and GPS technologies to deliver unmatched accuracy. LiCopter is designed to cater various application requirements.

Life Time Support

Customized multi-year support plans are available to meet specific requirements. Clients selecting a plan will receive lifetime online support.

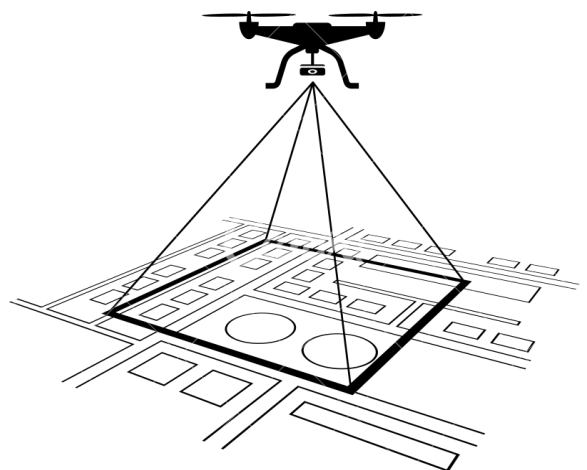

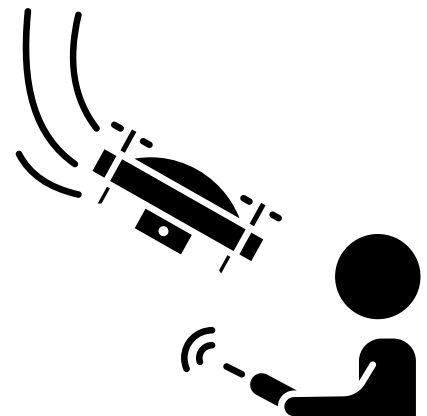

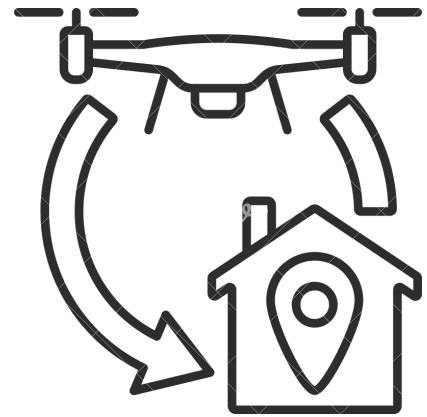

User-friendly Operation

No prior experience or knowledge is required; Licopter can be deployed by following our tried and tested simple to follow SOP of flight with minimum learning curve.

Unmatched Safety

- Return-to-home in case of communication failure.
- Return-to-home on low battery
- High wind alerts for enhanced safety.
- Return-to-home on high wind.
- Safe landing mechanism in the event of motor failure.
- Multiple onboard GNSS receivers for redundancy against GPS failure.
- Autonomous-flight termination system for critical safety.
- Capable of operating in high electromagnetic interference areas.
- Comprehensive pre-flight checks for mission readiness.

Drone Specifications

LiCopter is a revolutionary LiDAR drone for the survey industry, featuring in-house developed LiDAR technology and advanced sensor integration capabilities.

40 + Minutes Endurance

The compact and foldable autonomous drone (900mm to 450mm) makes it easy to carry and always ready for deployment anywhere within few minutes.

Technical Data

	LiDAR (Li P720)	61MP Camera	Oblique (5-in-1 Camera)
Max. Take-off Weight	8.65 kg	8.4 kg	8.4 kg
Max. Flight Time	Up to 40 Min	Up to 45 Min	Up to 45 Min
Above MSL Altitude	4500 m	4500 m	4500 m
Communication Range	Upto 5 km	Upto 5 km	Upto 5 km
Optimal Cruise	8 m/s	10 m/s	10 m/s
Wind Tolerance	12 m/s	12 m/s	12 m/s
Operating Temp Range	-15° to 57°C	-15° to 57°C	-15° to 57°C
Ready to Fly Size	900 mm	900 mm	900 mm
Max. Area Coverage (@100m)	1 km²	1.2 km²	1 km²
Data Acquisition Rate	720,000 Points/Sec	1/8000 Sec	5 synchronized cameras
Measuring Range	190 m @ 10% Reflectivity	2 cm GSD @ 200 m	3 cm GSD @190 m
Field of View (FOV)	70°	63°	Horz: 36° & Vert: 25°
Measuring Accuracy	Better than 60 mm	Better than 40 mm	Better than 50mm
Built-in Camera	26 MP	61 MP	130MP

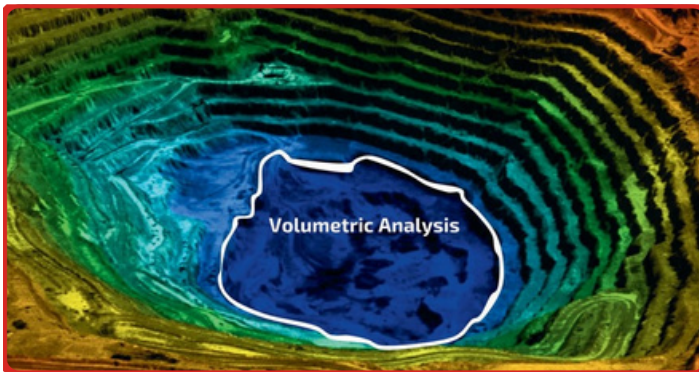

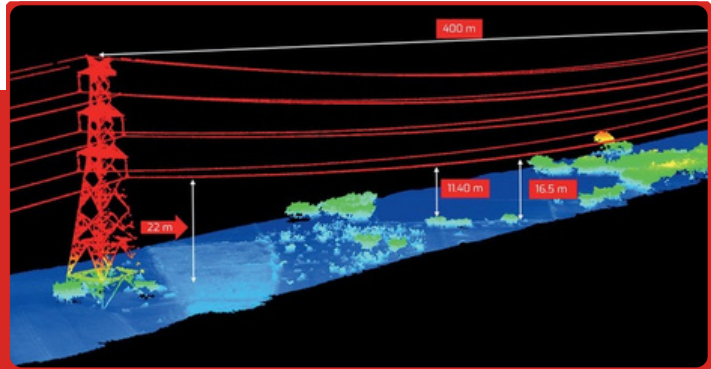

*A smart and light way to carry the highly autonomous drone with the compact trolley industrial case.

Applications

Powerline Inspection

- Accurate Vegetation Management
- Enhanced Safety & Reduced time
- Detailed 3D Models
- Fault Detection

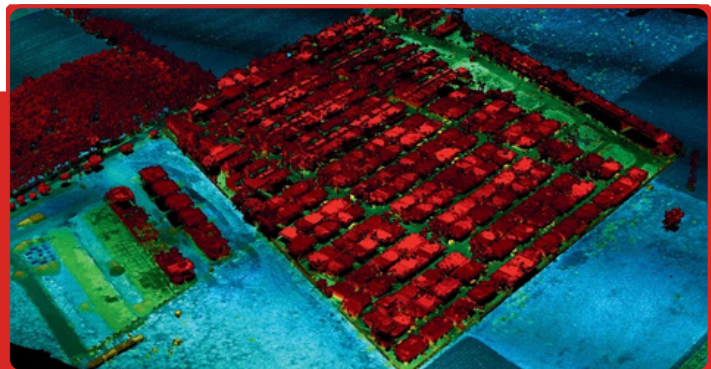

Construction & Mining

- Accurate Terrain Mapping
- Detailed Site 3D Survey
- Volumetric Analysis
- Safety Compliance

Survey & Mapping

- Ultra High resolution True Orthophoto
- LiDAR data with > 200pts/sqm
- Precise Digital Elevation Model
- Achieves centimeter-level accuracy

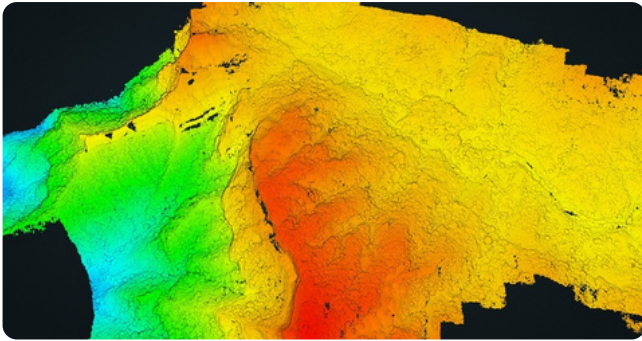

Disaster Management

- Rapid Damage Assessment
- Infrastructure Inspection
- Mapping for Rescue Missions
- Monitoring Flood or Fire Spread

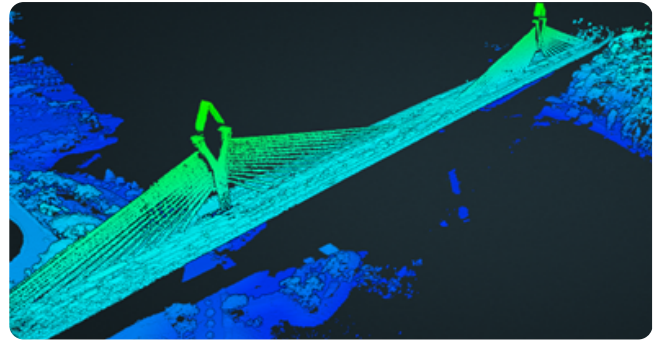

Successful Case Studies

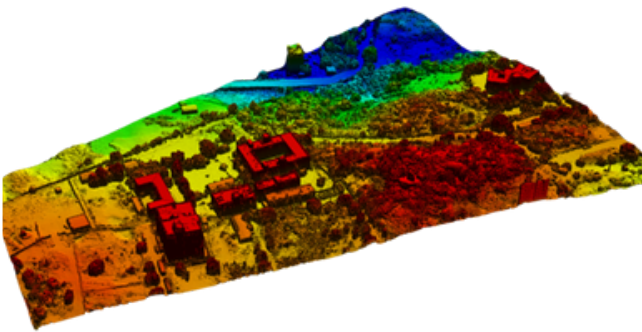

Mountain Terrain Mapping for Dam and Reservoir Planning

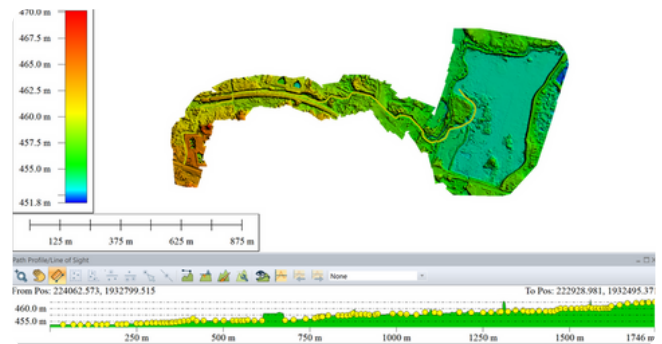

Hi-Tech City & Amaravati 3D LiDAR Mapping

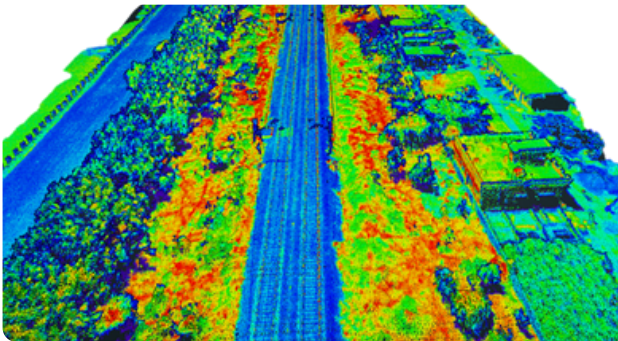

Asset and Land Management

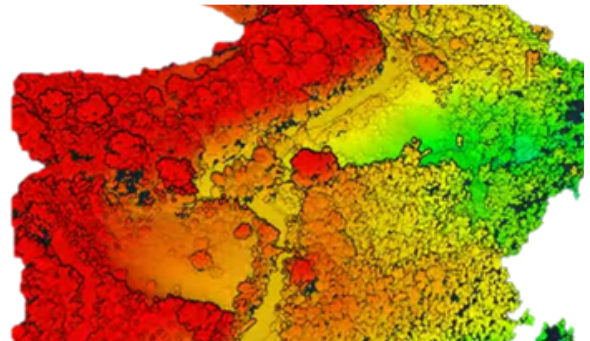

Urban Nalla & Lake Rejuvenation Mapping

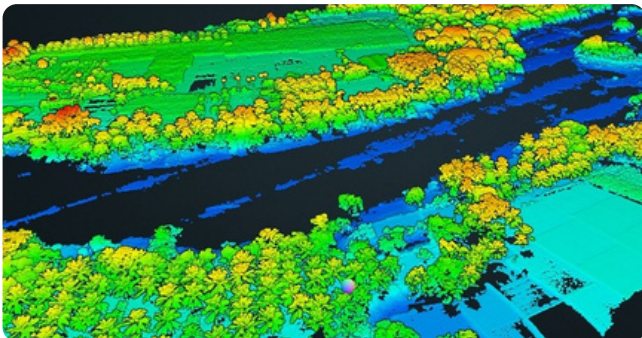

Railway Gradient and Alignment Mapping

Road Corridor Mapping – Assam (Challenging Terrain)

River Basin Mapping for Flood and Erosion Resilience

Volumetric Analysis for Coal and Sand Stockpiles

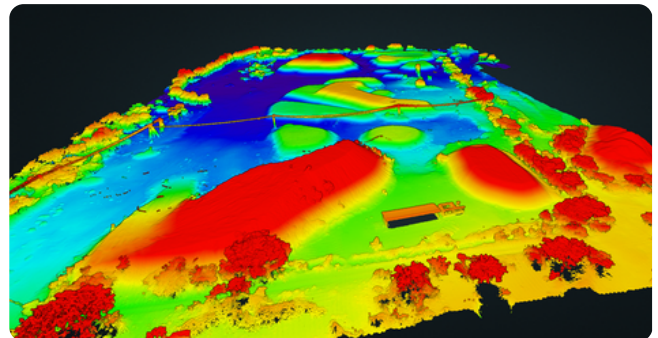

Photo Gallery

Honoured to present our indigenous LiCopter to the Hon'ble Prime Minister, Shri Narendra Modi Ji at the Viksit Bharat - Young Leader Dialogue 2025 Event.

Near High-Rise Building Flight

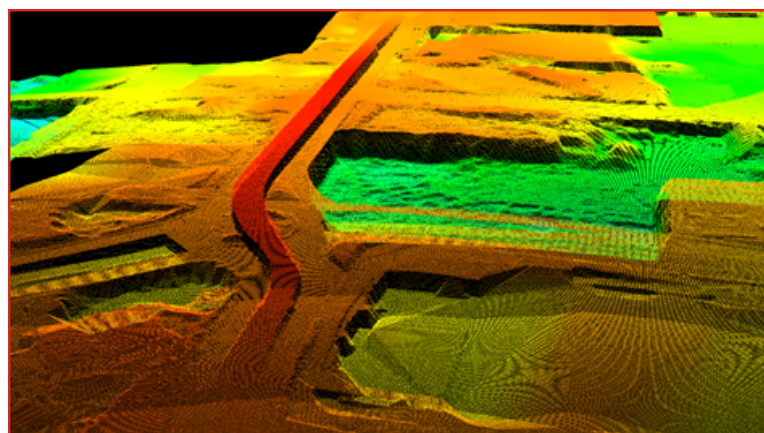

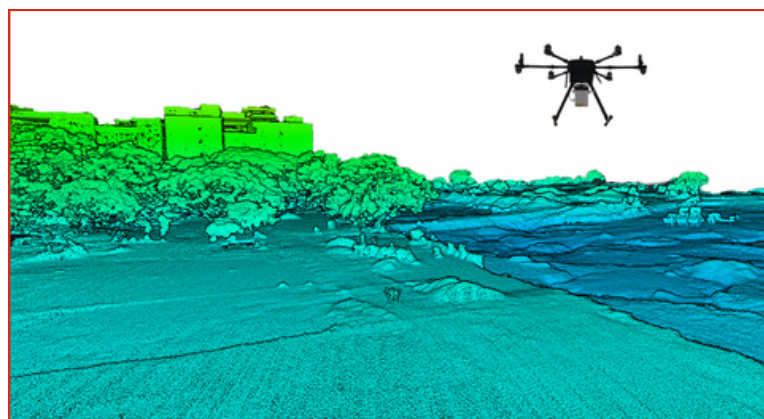

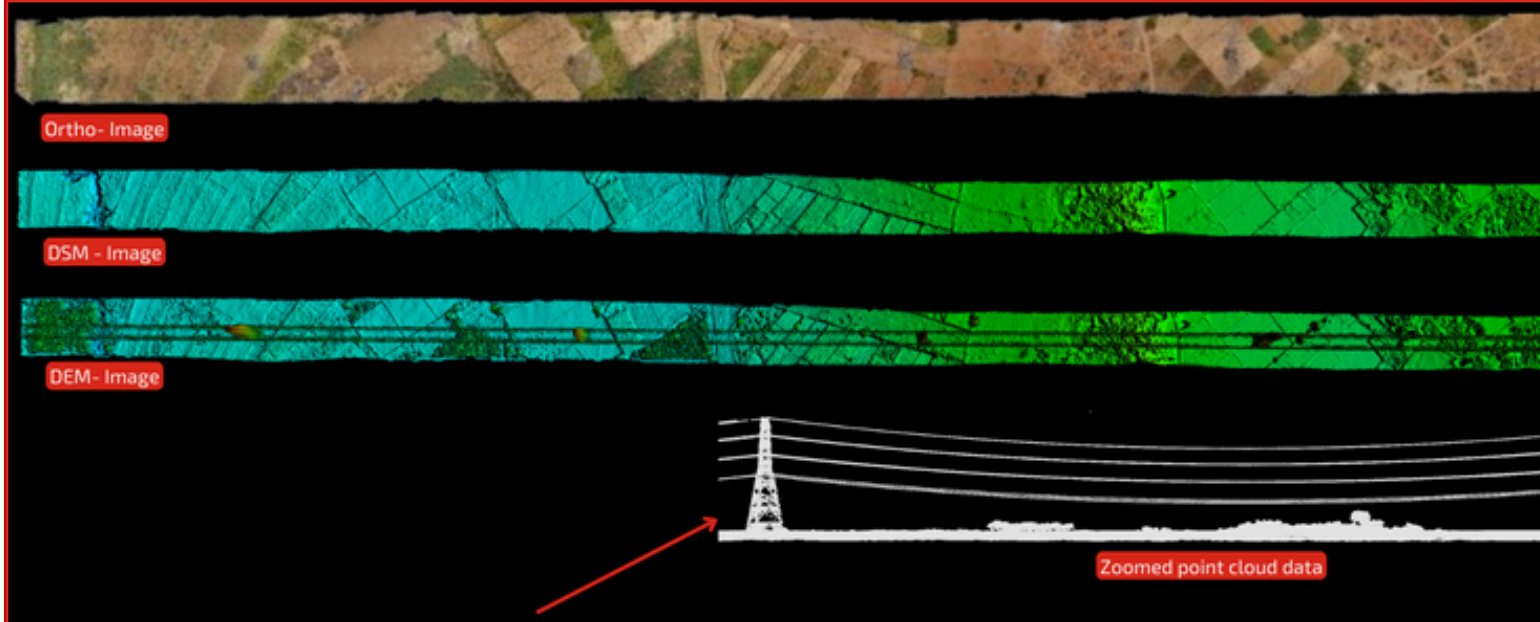

4000m+ AMSL Operations

High-Interference Flying Capability

High Wind Resistance
